

## **CSE110M240T14 User Story**

1. As a user, I want to see the nearby restrooms as dots on a map after opening the application (no registration required), so that I know where I should go to find the restroom.
2. As a user, I want to see the description of the restroom after clicking on it in the map, so that I can know more about the restroom before I arrive.
3. As a user, I want to see the rating of each restroom that displayed on the map in the description, so that I know which one is recommended by previous users.
4. As a user, I want to know the exact location in the description of the restroom, so that I know how to get there.
5. As a user, I want to know the amenities inside the restroom, so that I can know if there is anything I need to bring myself.
6. As a user, I want to scrawl on the "Wall" of each restroom so that I can have fun while using the restroom.
7. As a user, I want to have the feeling of real painting on the "Wall" of the app, like drawing on the real wall, that you cannot erase what you had written, and can overwrite what people had written.
8. As a user, I might not want the Wall to be too scratchy to add anything on the Wall after everyone else had already drew on, so that I might want the Wall to be reset after a period of time.
9. As a user, I want to be able to see a rating bar for the restroom so that I give a rate for it.
10. As a user, I want to add a new restroom near my location to the map, and rate it.
11. As a user, I want to be able to create a customized name for the restroom I added.
12. As a user, I want to be able to write descriptions for the restroom, so that I could provide more information for the other users.
13. As a user, I want to see the restroom on the map after I create it.
